## (54) END PART CUTTING DEVICE FOR BAND BLADE

### (57)Abstract:

**PURPOSE:** To enhance safety of cutting work by considering a device such as preventing springing up a cut piece (cutting chips) of a band blade in the periphery, in the cutting work by the band blade like a Thomson blade.

**CONSTITUTION:** A movable rod 9 is reciprocatably inserted to a block 8 having a guide hole. A fixed blade 5a in an end face of the block 8 and a movable blade 6a in a shoulder part 11 of the movable rod 9 are provided, to provide a recessed part 18, shaped by the shoulder part 11 and a neck part 10, in the movable rod 9. By forwardly moving the movable rod 9 to move the movable blade 6a along a double sliding route against the fixed blade 5a, an end part of a band blade 200 is cut. A cut piece 210' is captured by the recessed part 18 of the movable rod 9.
